

The New Way to Buy Solar

Instant quotations. Killer prices. Awesome Installations.

Door Knockers Be Gone Instant Quotation For Homeowners Going Solar

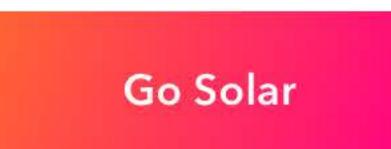

Pingo has cut down the costs of traditional solar installers. No showy showrooms and no expensive sales people. Because of that, we pass along *more value to you*.

Awesome Products, Killer Prices

Pingo works directly with manufactures, bypassing middlemen to give you great products at unbelievable prices.

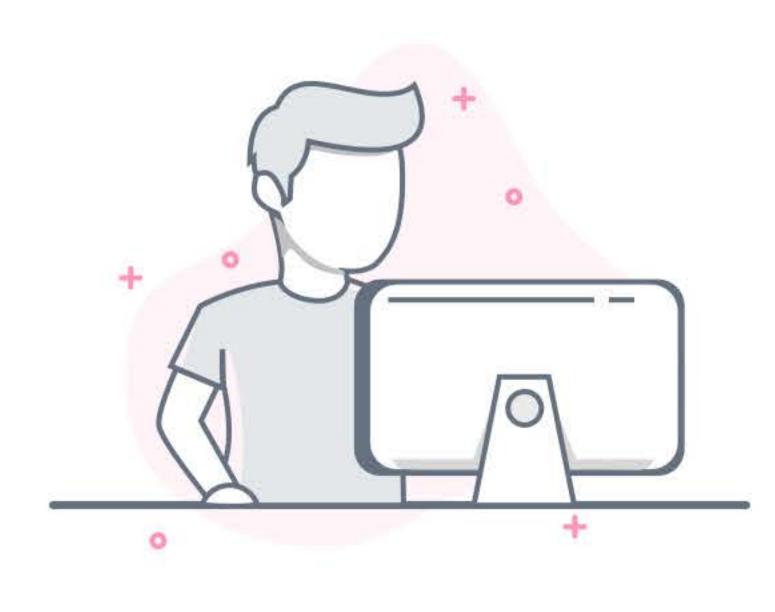

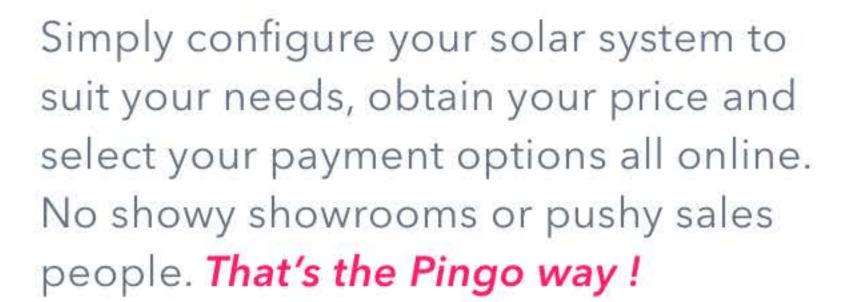

How Pingo Works

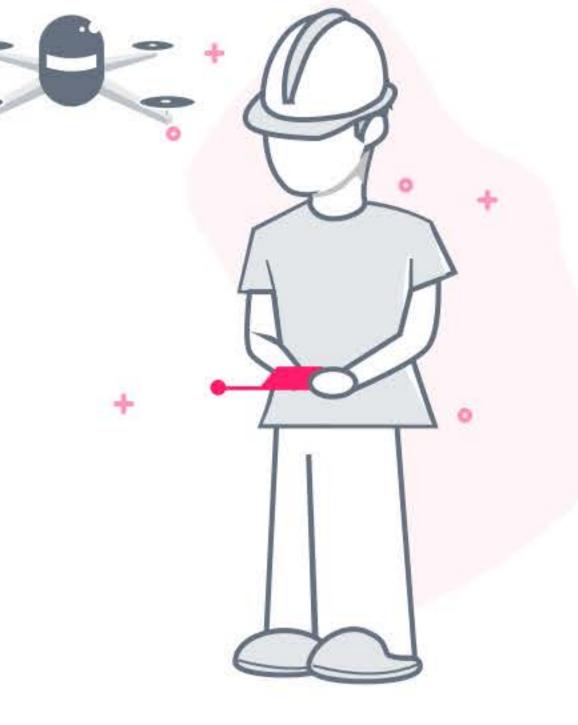

CONFIGURE YOUR SOLAR SYSTEM

SCHEDULE YOUR SITE 2 AUDIT

CONFIRM INSTALLATION 3 DATE

After you've selected your payment options, your Pingo project manager will call you to schedule a site audit, plans, schedule a convenient true-up your solar system layout and walk you through the next steps.

Once your site audit is complete, simply download your engineered installation date and harness the power of the sun.

Why Pingo

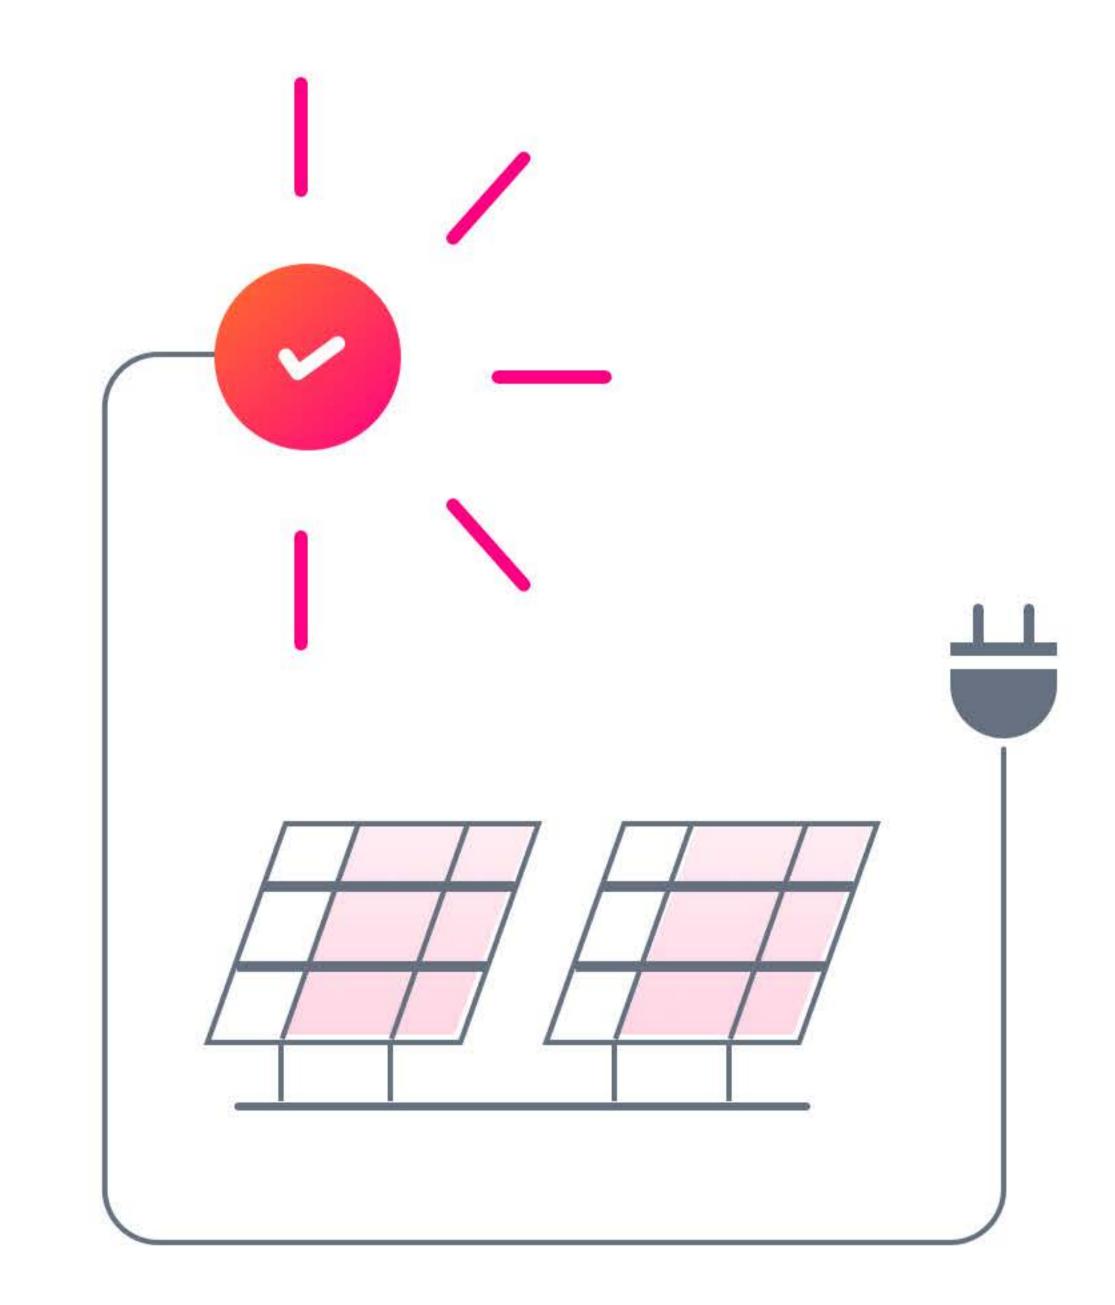

Pingo has cut down the costs of traditional solar installers. No showy showrooms and no expensive sales people. Because of that, we pass along more value to you.

Transparency

Get instant pricing online with unmatched economic value through our intuitive solar design tool.

Pricing is transparent, the process is streamlined and installations come with a smile.

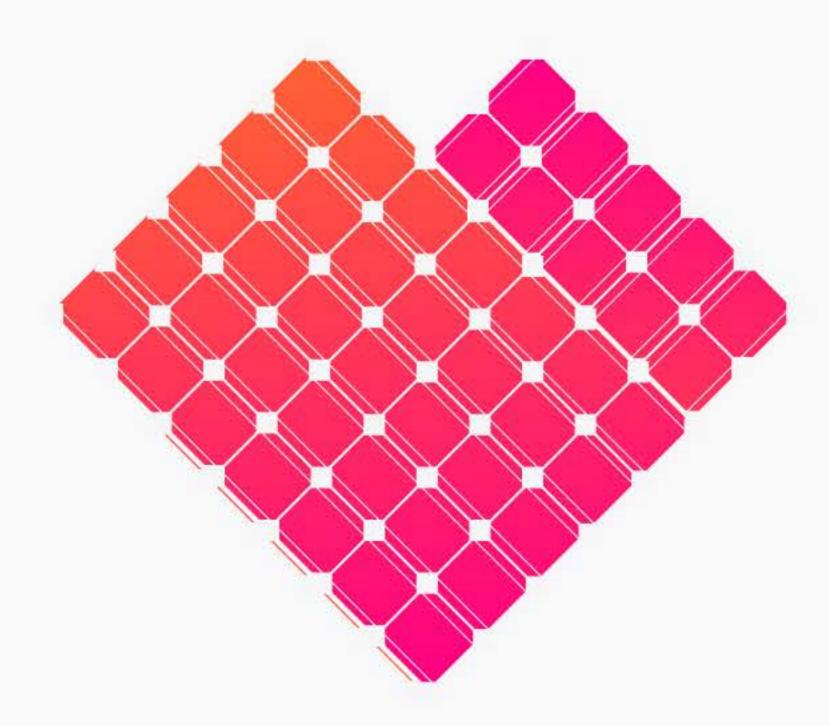

Awesome Products

Pingo works directly with global manufacturers to deliver you the best products at unbelievable prices.

Unmatched Customer Care

All Pingo solar systems come with monthly solar production monitoring reports. Have peace of mind knowing your solar system is working as promised. That's the Pingo way!

First Class Warranties

If you do not generate the electric power as stated in your solar installation agreement, Pingo will provide you a refund for the lost power.

If your modules do not produce power as stated on the specification sheet, Pingo will repair or replace the solar module at no cost to you.

If anything goes wrong with the inverter during the warranty period, Pingo will repair or replace the inverter at no cost to you.

If anything goes wrong with the DC optimizer during the warranty period, Pingo will repair or replace the inverter at no cost to you.

All Pingo solar systems come with a 12 year cellular service based solar monitoring subscription.

Pingo warrants against any damage from any penetrations made on your roof. It's not just a warranty, it's a promise we make to you and your family.

Use our tool to build your system Here's how it works

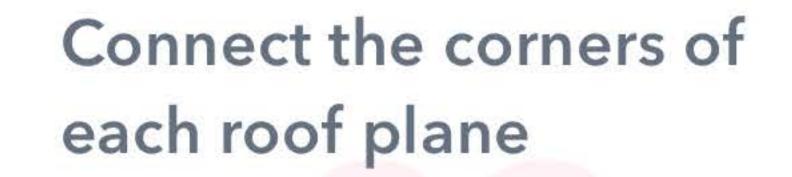

Find your home using our solar design tool

Enter your home address and your average monthly electricity bill on our solar design tool.

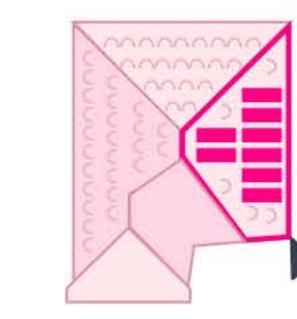

Using our solar design tool, connect the corners of your roof plane to calculate the number of panels that can be installed. See our Tutorial Video

We help you determine how many panels you'll need

Our design tool helps you determine the correct number of panels you'll need to offset your current electrical needs and reach your full solar potential. See our Tutorial Video

Get your quote

Get your quote instantly and schedule a call with our technicians. We'll walk you through the process in an easy and enjoyable process.
